RESPONSE TO THE MARCH 25, 2002, RESTRICTION REQUIREMENT

This paper is submitted in connection with the above-identified U.S. Patent Application and is responsive to the Restriction Requirement that was mailed by the United States Patent and Trademark Office on March 25, 2002. A response to the March 25, 2002, Restriction Requirement is due on April 25, 2002, and as such this response is being timely filed.

Detailed Response

Disposition of the Claims

Claims 1-22 are currently pending in the application and are the subject of a Restriction Requirement.

Att. Docket No. REG-42-C
USSN 09/577,468
Filed May 24, 2000
Response to the March 25, 2002,
Restriction Requirement

Restriction

The Examiner has taken the position that the subject application contains five separate inventions or groups of inventions and has required restriction to one of those groups under 35 USC §121. The Examiner has identified these groups as Groups I-V as follows: Group I, consisting of claims 1-3 (each in part), 12, 18 (in part) and 20-22 (Each in part), drawn to methods of inducing weight loss or preventing/treating diabetes by administering AX-15. Group II, consisting of claims 1-3 (each in part), 12, 18 (in part) and 20-22 (each in part), drawn to methods of inducing weight loss or preventing/treating diabetes by administering AX-2. Group III, consisting of claims 14 (in part), 15 (in part) and 16, drawn to compositions comprising AX-15. Group IV, consisting of claims 14 (in part), 15 (in part) and 17, drawn to compositions comprising AX-13. And Group V consisting of claims 18 – 20 (in part) and 22 (in part), drawn to methods of treating a neurodegenerative disorder comprising administering CNTF.

Election

Applicants hereby provisionally elect Group I, consisting of claims 1-3 (each in part), 12, 18 (in part) and 20-22 (each in part), drawn to methods of inducing weight loss or preventing/treating diabetes by administering AX-15, and respectfully traverse the Restriction Requirement as follows.

With respect to Groups II - V, Applicants contend that it would not be a serious burden on the Examiner to search the Groups together. A search of the literature for the methods of Group I would be nearly identical to the search performed for Groups II -V as each group shares the limitation of nasal or respiratory administration of a CNTF, therefore, would necessarily turn up references relevant to both groups. Applicants respectfully contend that restriction of claims 1-22 into five Groups is not proper and request that the Examiner reconsider and withdraw the Restriction Requirement. Applicants believe that because all of the claims are so closely related, they should remain in the same application to preserve unity.

Att. Docket No. REG 142-C
